

Roadmap to recognition as a national centre of excellence in Ethnic health research

- PRIORITY AREAS:**
- > CARDIO-METABOLIC DISEASE
 - > MULTI-MORBIDITY
 - > MENTAL HEALTH
 - > NEW MIGRANT HEALTH
 - > MATERNAL HEALTH
 - > DATA SCIENCE

	Discovery Science	Applied Health Research	Implementation & Community engagement	REDUCING HEALTH INEQUALITIES
AIMS:	<ul style="list-style-type: none"> Improved knowledge and understanding of discovery science in BME communities Increased involvement of BME communities in Precision Medicine studies 	<ul style="list-style-type: none"> More ethnic health focussed applications Return on investment to 3x through follow on research funding 	<ul style="list-style-type: none"> Evidence we generate utilised in clinical practice Inclusive community engagement university wide Contributions to CCD programme 	<ul style="list-style-type: none"> Improved representation of BME communities in large population based studies Ensure diverse communities have a voice in setting research priorities Culturally competent delivery of health care
ACTIONS:	<ul style="list-style-type: none"> Explore LPMI & BRC and other opportunities aligned with priority areas Scope data sharing needs Develop strategy & business plan 	<ul style="list-style-type: none"> Contribute to further funding applications Establish Community Partners Panel Explore opportunities with LRWE Unit using CPRD 	<ul style="list-style-type: none"> Promote centre services internally/externally Deliver Community Engagement and Cultural Competency training and resources Investigate inclusive community engagement opportunities 	<ul style="list-style-type: none"> Compile a multi-disciplinary research network of internal and external researchers with an interest in ethnic health Promote ethnic health events with SAHF and AHSN and through University roadshows Host a national launch event for the Centre
OUTCOMES: Short-term	<ul style="list-style-type: none"> Joint projects with LPMI and BRC and others, expanding capacity 	<ul style="list-style-type: none"> Increased development grant award income Increased awareness of research outputs across University 	<ul style="list-style-type: none"> Increased number of outward facing events Increased number of partnerships with external organizations 	<ul style="list-style-type: none"> Devise a central resource and training hub to support individuals and organisations
OUTCOMES: Long-term	<ul style="list-style-type: none"> Ensure robust monitoring and reporting of participation from BME communities 	<ul style="list-style-type: none"> Increased research income for applied health research projects Co-ordination and profiling of ethnic health research studies university-wide 	<ul style="list-style-type: none"> Recognition as a national centre of excellence in ethnic health Capital investment for development of a 'community research hub' 	<ul style="list-style-type: none"> Gathering real world evidence of ethnic health focussed projects to identify impact on health inequality
